

hello PIXI™

The Catit kit includes a base model Pixi Fountain and a matching color Pixi Elevated Bowl, both packed in a box that is only slightly larger than the fountains on their own. Additionally, the kit includes a total of three filter cartridges, in contrast to the single one that usually comes with a fountain.

We have created four versions of this kit, each corresponding to one of the base colors (white, pink, blue, green).

We do not offer the elevated bowls in green, blue, or pink versions separately; therefore, this kit is currently the only way to obtain them. It is an ideal option for some your accounts exclusivity.
